

Combi-Chef IV

The award winning Combi-Chef IV combination microwave oven is the most versatile, competitively priced oven in its class. Featuring nine modes of cooking and reheat options, this state of the art oven microwaves, bakes, roasts and grills to perfection in minutes. Combi-Chef IV allows caterers the flexibility to produce the most comprehensive of menus from just one table top appliance.

A unique attribute of the Combi-Chef IV is the facility to alter cook and time modes whilst the unit is in operation – essential in the pressurised kitchen environment.

As all caterers will know too well, often many different foods need to be cooked at the same time and the five shelf positioning in the Combi-Chef IV allows you to do this with ease. In addition, the grilling height can be adjusted even when the door is open.

The drop-down door provides easy access and safe removal of food products while saving precious space on the table top, leaving more room for food preparation. The unit even accepts metal baking tins in some combination modes and is simple to operate with accurate dial controls.

Output power:	1200W (Microwave) 1900W (Powerful Variable Grill) 0-250°C (Convection Oven)
