Completely silent mini fridges

- **Electronic temperature control (Fuzzy Logic)** with automatic defrost
- **Everlasting lighting with Infra Red door sensor**
- Changeable outer door panel
- Reversible door opening (left and right-hinged)
- Available in 3 colours (white, black and aluminium)
- Free-standing and built-in version

Dometic DS 200 & DS 300

The DS 200 is easy to install and is small enough to fit anywhere - but big enough for a wide selection of drinks and snacks.

The DS 300 has an attractive and practical size. Both models also feature self-cut of the shelf in order to have space for huge bottles (1.5 l)

Dometic DS 400 & DS 600

The worldwide best selling model - the DS 400 is your partner for serving cool drinks and food.

The DS 600 is the largest member of the Dometic Silencio miniCool range. It has the biggest interior volume in the entire Silencio product range. Both models are available in stylish aluminium, and feature variable door racks.

The lowest energy consuming absorption miniBar in the world

Every HiPro miniBar contains the best of 90 years of experience. The HiPro 3000 is the lowest energy consuming absorption miniBar in the world!

Dometic HiPro has redefined the standards for pioneering miniBar design – the result of over nine decades of consistent development. With the aim of maximum customer satisfaction, we have scrutinised all the requirements of comfort and technology in detail. The result will impress you.

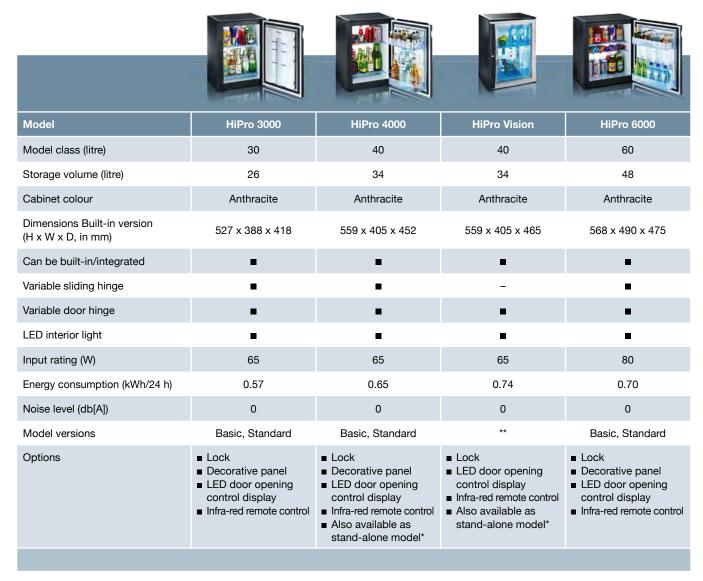

HiPro miniBars are distinctive due to their progressive design and a whole host of innovative technical detail solutions that are so unique that we have grouped them together under the name HiPro technology.

HiPro technology stands for a quality dimension which only Dometic can offer you.

- Modular system of shelves and door racks
- Lowest energy consumption for noiseless absorption miniBars
- Setup diagnosis via LED
- Sensor-controlled LED interior light
- LED door opening control display (optional)
- Temperature setting by remote control
- Clip & Click: door hinge can be changed without tools
- Fuzzy Logic Technology
- Automatic Defrost

- 2 short shelves
- Inner door with 2 multifunctional racks (one for large bottles and one for small)
- Inner door in the "bottle body" design for 1.5-litre bottles
- Integrated door handle

14 Comfort Class Classic Line

Classic Line

Easy replacement or additional comfort

Just replace or upgrade with silent cooling comfort. Proven standard dimensions ensure quick and easy installation without furniture modification.

Energy-saving made easy. With the Classic Line models, contemporary cooling comfort has now arrived. Equipped with innovative and energy-efficient absorption cooling technology, the miniBars ensure silent service and maintenance-free comfort with added value. This is also due to sensor-controlled monitoring of the cooling unit, energy-efficient Fuzzy Logic temperature regulation, automatic defrost and proven Dometic design.

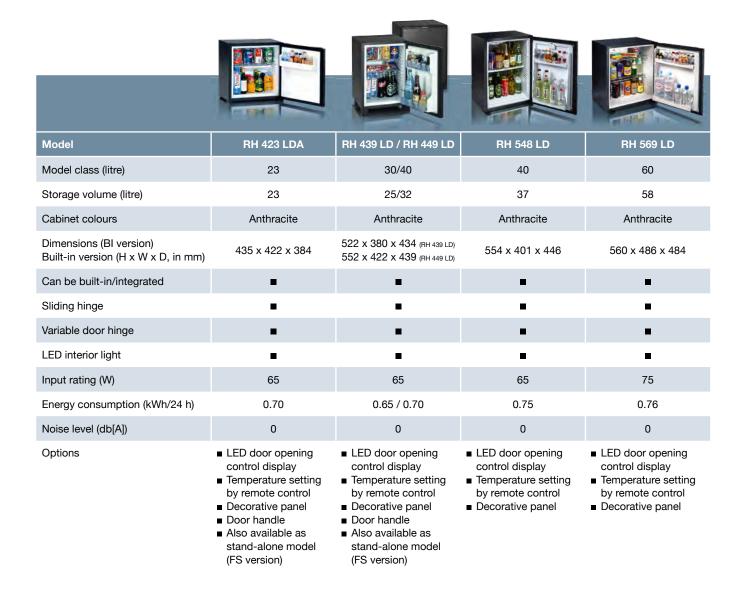

TIP

Are your miniBars more than 15 years old?

If yes, it's worth replacing your appliance immediately. You can save on energy by more than 50% with today's miniBars featuring Fuzzy Logic technology. Just by saving on energy, your new investment will pay for itself within a few years, because old miniBars sometimes consume more than double the energy. Get in touch with us! We will be glad to advise you.

18 Comfort Class Basic Line

Basic Line

The value-for-money class

Dometic quality at a great price. With the 30 and 40-litreclass miniBars of the Basic Line, you can get to know the value-for-money side of silent cooling comfort.

Technically advanced and absolutely reliable, the models represent an efficient view of modern absorption technology – made in Europe. This means you can blend the comfort of today with advanced Fuzzy Logic technology without exceeding your budget.

ΤIΡ

Selling miniBar products is not generating profit for you?

Nevertheless, a cooling option in the room can still offer an extra service benefit. Provide your guests with an empty miniBar. They can cool their own drinks, medicine, cosmetics, baby food and many other things – an extra service from you to your guests!

miniCool health care refrigerator

For maintaining optimum temperatures

The ideal solution for storing heat-sensitive medicine safely at a temperature between 2 °C and 8 °C. The compartments enable you to keep the medicine arranged and grouped clearly. A digital thermometer monitors the internal temperature and stores the highest and lowest temperature for a control period set by you. Both products are now available with compressor cooling technology and further reduced energy consumption.

Perfectly suited for:

pharmacies doctors' practices nursing wards nursing homes

- LED interior light
- Drawers with flexible compartments for well-arranged storage of medicine
- Digital thermometer with memory (min./max.)
- Audible warning if the door is open for more than 20 seconds
- Constant temperature level due to integrated fan
- Door lock for secure storage
- **New:** Optionally with compressor cooling technology

Dometic miniBars

Handy hints on ventilation

To ensure optimum cooling performance with minimum energy consumption, several basic principles need to be followed when installing an absorption miniBar. The heat which the cooling unit extracts from the refrigerator interior is emitted at the back of the miniBar.

There must be sufficient ventilation here to prevent a

build-up of heat. The free ventilation space for incoming and outgoing air should be at least 200 cm². The distance from the rear of the miniBar to the rear wall of the furniture must be at least 2 cm. When installing the miniBar, ensure that it is standing on a stable and horizontal surface, and not directly near a heat source.

Outgoing air (warm), incoming air (ambient)
