

Countertop Fryers

hallco

Yielding consistently high performances, our reliable and efficient fryers are a must for any quick service/ foodservice operator. Our comprehensive range offers a model to suit every need. Our fryers are manufactured from high quality stainless steel and feature a heavy-duty basket, batter plate and lid plus a thermostatic control to ensure consistent results with every use.

Ease of cleaning and maintenance is a key consideration with all foodservice equipment, but especially with fryers. Our models are designed to prevent dirt or grease traps and all have removable tanks and fryer heads with built in safety locator cut outs to ensure the appliance can't be used unless correctly re-assembled. A further safety feature is an overheat cut out to prevent oil from overheating – this also helps prolong the life of the fryers.

All models are manufactured in Europe to high quality standards and are backed up by a 1 Year Full Warranty

MSF5
